Assignment #4

A. <u>Identify</u> relevant concepts in an Agile organization, including IT and non-IT (roles, organizational structures, etc). <u>Present a concept map (cmap)</u> of these concepts and how they relate to each other (1 slide) and a <u>short explanation</u> of each concept (1-2 slides)

B. Map the concepts presented in A. to the concepts of a "traditional" organization, describing similarities and differences

C. Describe briefly (3 slides max) how the work on projects X, Y and Z for team A would proceed using a Kanban system
